EDUCATION

Kennesaw State University

Bachelor of Science in Computer Science

Kennesaw, GA

Expected December 2026

Relevant Coursework: Data Structures, Algorithm Analysis, Operating Systems, Machine Learning, Deep Learning

EXPERIENCE

Wellstar Health System

Platform Applications Intern

Marietta, GA

November 2025 – July 2026

- Developed **ServiceNow** workflows using **JavaScript**, Business Rules, and Script Includes to automate IT operations
- Built **REST API integrations** with ServiceNow Integration Hub, enabling data exchange across enterprise platforms
- Automated **ITSM workflows** supporting 200–600 tickets and reduced the unresolved backlog rate from **80% to 20%**

Shaw Industries

Cybersecurity Co-op

Dalton, GA

January 2026 – June 2026

- Built **Microsoft Sentinel** pipelines using Data Collection Rules, custom tables, and schemas for non-native telemetry
- Built a **CEF/syslog pipeline** for Palo Alto firewall events with severity-based filtering and structured field mapping
- Validated ingestion accuracy through **KQL** schema checks and cross-source correlation in Azure Log Analytics

Headstarter AI

Software Engineering Fellow | Remote

July 2025 – September 2025

- Built five AI applications using **Pinecone**, Gemini API, **vector embeddings**, and **RAG** for semantic retrieval
- Analyzed application and user data to improve AI features supporting **500+ users**

TrueSpice Foods

Web Developer Intern

Tucker, GA

May 2025 – August 2025

- Refactored responsive interfaces using **React**, semantic HTML, and CSS media queries across desktop and mobile devices
- Implemented lazy loading and front-end optimizations, reducing page-load time by **30%**
- Resolved accessibility issues involving semantic structure, navigation, and keyboard usability across key pages

UpCancer

Software Engineering Intern

Atlanta, GA

January 2024 – May 2024

- Developed **Python** and **TypeScript** **microservices** backed by Redis-cached PostgreSQL, increasing throughput by **15%** and reducing latency by **20%**
- Defined **REST API contracts** with front-end engineers, standardizing integration across distributed services

Lutheran Service School

Coding Instructor

Clarkston, GA

August 2021 – July 2022

- Taught **Python** basics to 25+ students through project-based lessons adapted for learners with limited English fluency

PROJECTS

Neighborly

GitHub: github.com/Igadsme/neighborly

September 2026 – Present

- Engineered Neighborly's marketplace using **Next.js**, **TypeScript**, **PostgreSQL**, and **Redis** with listings and messaging
- Built geospatial matching APIs with **PostGIS** and **Redis**, ranking nearby requests by distance, relevance, and trust

DevDash: AI-Powered Developer Productivity Platform

GitHub: github.com/Igadsme/DevDash

April 2026 – May 2026

- Built a full-stack SaaS app via **Next.js**, **Prisma**, and GitHub APIs to process **1,000+** commits, PRs, and CI/CD events
- Built **LLM-powered** summarization and task prioritization with OpenAI API, reducing manual reporting time by **60%**

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, Java, SQL, C++, C#

Frameworks/Libraries: React, Next.js, Node.js, FastAPI, Flask, PyTorch, TensorFlow, NumPy, Pandas

Cloud/DevOps: Azure, AWS, Docker, GitHub, Jenkins, Jira

Databases: PostgreSQL, Redis, MongoDB, MySQL

AI/ML & Security: RAG, Vector Embeddings, YOLOv8, LLM APIs, Pinecone, ServiceNow, Microsoft Sentinel, KQL

LEADERSHIP, AWARDS & ACTIVITIES

ANDY 8 Project Coordinator | August 2026–Present: Lead planning and delivery for an autonomous drone system

Peer Mentor, Mission Bit: Guided 15 high school students through coding projects and computer science fundamentals

Recognition: 6x Hackathon Winner | **NestAI:** 2nd of 32 Teams | 3x Dean's List | 2x President's List

Activities: 13x Hackathon Participant | **Member:** SHPE, KSU AI Club, KSU ColorStack
